

CASE STUDY

NAVY

SOLUTION

ACG Systems provided a complete turnkey solution for the upgrade of the worldwide Navy ELMR System including installation, integration, and optimization service of COTS product manufactured by Motorola Solutions. The system upgrade brought various releases of Motorola's ELMR zone cores to a uniform 7.13 platform. This upgrade will provide a seamless transition for all future Motorola releases.

As part of the project ACG Systems managed both CONUS and OCONUS upgrades in more than 5 countries. This included portable radio subscriber technology refresh, de-conflicting the Navy global fleet map, system staging, implementation, on-site training, all associated documentation and drawings required by the United States Navy.
